Product Backlog:

ID	Theme	As a	I want to	So that	Notes	Points	Who	Sprint
1	Content	User	Be able to display shapes	I can model graphics	Implement Render Area	20	Juliette	2
2	Content	User	Be able to Log in	I can view the displayed shapes	Implement Login App	10	Houssin	1
3	Content	User	Be able to save	So I can exit and come back	Implement Serializer	15	Thomas	2
4	Content	User	Be able to add shapes	I can edit the window/project	Implement Add feature	10	All	2
5	Content	User	Be able to delete shapes	I can edit the window/project	Implement Delete feature	10	All	2
6	Content	User	Be able to move shapes	I can edit the window/project	Implement Move feature	10	All	2
7	Content	User	Be able to contact the company	I can tell them how amazing they did	Implement logo and contact us	7	Niko/Samuel	1
8	Content	User	Be able to get help	I can continue working if stuck	Implement Help Button	3	All	2
9	Personalization	User	upload a file of shapes	I can quickly added lots of shaes not manually	Implement Parser	10	Juliette	1
10	Personalization	User	Be notified of corruption	If I have a corrupted file I can continue working and fix later	Implement Input validation	5	Thomas/Juliette	2
11	Back End	Programmer	Store the shapes in a vector	The shapes are containerized	Implement Vector	10	Thomas	1
12	Back End	Programmer	Have a hierarchy of Shapes	Multiple specific shape types can be stored/displayed cohesively	Implement Shape Classes	10	Niko/All	1
